PROFESSIONAL SUMMARY

Software Engineer with over 5 years of professional experience developing scalable, high-performance systems across diverse domains, including CRM, healthcare applications, and technical analytics. Proficient in full-stack development, cloud deployments, and CI/CD pipelines, with expertise in Python, PHP, Node.js, Express.js, React.js, and AWS. Focused on delivering impactful solutions that drive measurable business growth and efficiency.

TECHNICAL SKILLS

Programming Languages: Python, PHP, SQL, JavaScript, **Frameworks:** Laravel, Express.js, Vue.js, Next.js, Bootstrap, **Frontend:** React.js, Vue.js, Material UI, **Backend:** Node.js, Express.js, Laravel, **Tools:** PHPStorm, VS Code, Postman, Git, Docker, **Databases:** MySQL, PostgreSQL, **Platforms:** Ubuntu, CentOS, **Methodologies:** CI/CD, **Libraries:** jQuery, Axios, Chart.js, Laravel Packages, Python (TA-Lib), **Others:** AWS, Google Maps, Highcharts

PROFESSIONAL EXPERIENCE (5+ Years)

Equity Pandit (Senior Software Engineer) - Oct 2023 - Nov 2024

- Improved system **efficiency by 70% through designing and implementing** new systems using Node.js, Express, and React.js. Deployed on AWS EC2 with Git version control and CI/CD pipelines, ensuring seamless integration and deployment.
- Implemented Python-based analytics libraries using FastAPI for data-driven decision-making within the product.
- Contributed to $50,000+ in revenue growth by delivering high-quality software solutions. more

SecureMetaSys (Software Engineer) - Feb 2022 - Sep 2023

- Managed client relationships leading to a **20% increase in project retention**. Developed, deployed, and maintained full-stack projects using Laravel, Express.js and React.js on AWS (Lightsail, EC2) with CI/CD pipelines.
- Built and maintained SQL/NoSQL databases for projects such as Clinic Management System and Expense Manager Product APIs.
- Delivered an Education LMS platform, ensuring end-to-end software development and deployment.
- Collaborated with cross-functional teams to deliver standard CMS solutions and product development. more

Cirkle Studio (Product Developer) - Feb 2021 - Jan 2022

- Developed a company product using Laravel and React.js that integrated Google Maps and Highcharts to build a multi-business store locator. This solution boosted **client engagement by 35%** across multiple businesses.
- Deployed applications on Cloudways servers and maintained efficiency of the server.
- Translated client requirements into actionable technical solutions, delivering successful projects using Node.js and React
- Created APIs with comprehensive Postman collections for testing and documentation. more

Shankheshwar (Product Developer) - Sep 2020 - Jan 2021

- Managed and optimized the Laravel codebase, improving query performance and system reliability.
- Developed new features to enhance system functionality and user experience. more

Tryon InfoSoft (Full Stack Developer) - Feb 2020 - Aug 2020

- Built a multi-vendor e-commerce platform featuring seller product management, an admin dashboard, and a support panel. The platform launched successfully and **reduced manual vendor onboarding efforts by approximately 40%**.
- Deployed and managed the application using cPanel, ensuring smooth operation and ongoing maintenance. more

PROJECTS

Client Projects

Stock Market Platform, Insurance Company CRM, E-Learning platform, Risk Profiler

Personal Projects

Laravel API structure, Laravel Breeze API structure, Express api structure and starter kit more
